

PauaMac5 Incorporated

Progress towards an Objective Based Plan.

Pau5A

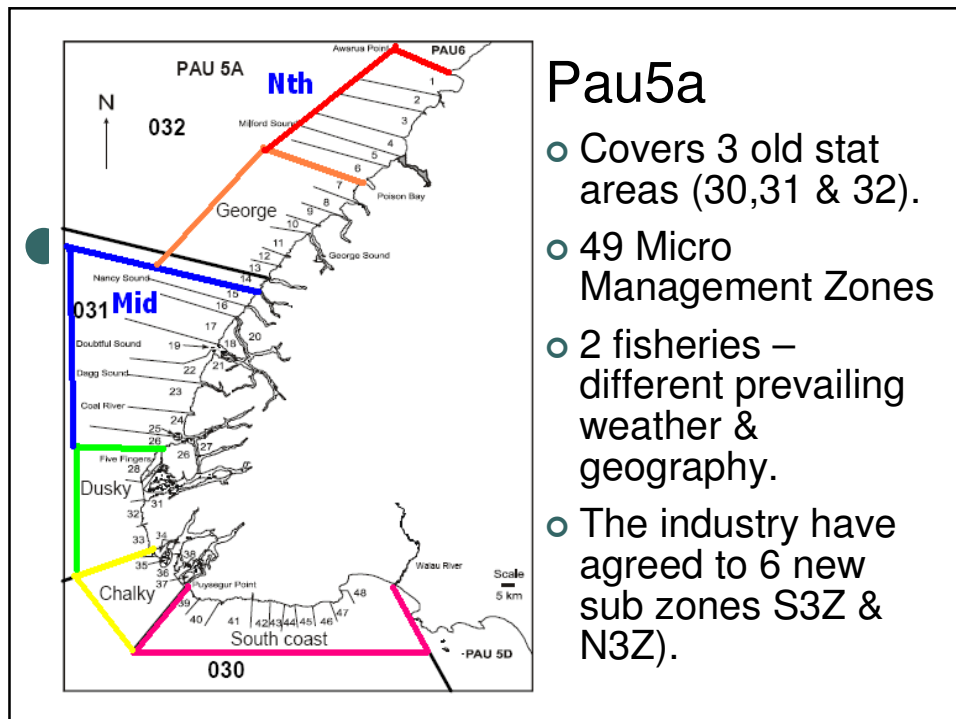

We have developed a package of management measures as the industries response to the Pau5a Initial Position Paper.

We are confident that the Minister will see this package as the way forward for this fishery.

We are approaching an OBP from a different direction than Pau7. Rather than build a plan around were we want to head we will be building a plan around what we have already implemented.

Pau5a

- Covers 3 old stat areas (30,31 & 32).
- 49 Micro Management Zones
- 2 fisheries – different prevailing weather & geography.
- The industry have agreed to 6 new sub zones S3Z & N3Z).

The industry package consists of:

The industry package consists of:

1. **A 30% reduction in catch** (45t) for the next 3 years.

The industry package consists of:

1. A 30% reduction in catch (45t) for the next 3 years.
2. ACE spreading over 6 sub zones (locks in 45t reduction from S3Z and no increase in the N3Z).

The industry package consists of:

1. A 30% reduction in catch (45t) for the next 3 years.
2. ACE spreading over 6 sub zones (locks in 45t reduction from S3Z and no increase in the N3Z).
3. Increase in MLS -130mm in S3Z & 127mm in N3Z.

The industry package consists of:

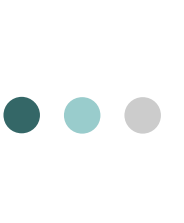

1. A 30% reduction in catch (45t) for the next 3 years.
2. ACE spreading over 6 sub zones (locks in 45t reduction from S3Z and no increase in the N3Z).
3. Increase in MLS -130mm in S3Z &127mm in N3Z.
4. \$500/t to be spent on reseedling in the S3Z.
5. 2 data loggers to record fishing in the N3Z – CPUE and Habitat mapping.

The industry package consists of:

1. A 30% reduction in catch (45t) for the next 3 years.
2. ACE spreading over 6 sub zones (locks in 45t reduction from S3Z and no increase in the N3Z).
3. Increase in MLS -130mm in S3Z &127mm in N3Z.
4. \$500/t to be spent on reseedling in the S3Z.
5. 2 data loggers to record fishing in the N3Z – CPUE and Habitat mapping.
6. Manual log book for any crews working in the S3Z (allows a decision rule to be produced in 3 years time).

The industry package consists of:

1. A 30% reduction in catch (45t) for the next 3 years.
2. ACE spreading over 6 sub zones (locks in 45t reduction from S3Z and no increase in the N3Z).
3. Increase in MLS -130mm in S3Z & 127mm in N3Z.
4. \$500/t to be spent on reseedling in the S3Z.
5. 2 data loggers to record fishing in the N3Z – CPUE and Habitat mapping.
6. Manual log book for any crews working in the S3Z (allows a decision rule to be produced in 3 years time).
7. All harvesters to attend a **SITO Paua harvesters course**.

As Quota owners have had to sign up to Catch reduction and ACE spreading it is an ideal time to roll everything into a document which details what we are doing in the fishery – a **fisheries plan**.

A summary of our initiative

1. A mandate from the quota owners ✓
2. Determine the management objectives ✓
3. Produce a plan to reach those objectives ✓
4. Ensure resources to implement the plan ✓
5. Implement the plan ✓

This is a Pau5A industry initiative that is being developed in real time. Over the next 3 years the package will be documented and this document will morph into a “Fisheries Plan”.

Its alive and happening and as such we see no need to rush to have it officially recognized under the Fisheries Act.

We are implementing our package first and then writing a plan around it second.
